

## Focus Open Silver – Outstanding Design

Focus Open 2011, the Baden-Württemberg International Design Award, has been a firm part of the German competition scene for many years now. Both in Germany and beyond its borders, this highly regarded design award enjoys a good reputation, and its respectability and non-commercial orientation means that it is held in high esteem. When the highest musicality connects with first-class design, it produces a masterpiece like the Schimmel C 116 Modern Cubus piano. The clear and minimalistic presentation stresses the vertical line and lends itself well to the model's size. New finishing techniques and materials, like aluminum used as counterpoint to the polished piano lacquer, underline the important visual elements of the instrument.
