

From „Classica“

September issue 2009

“The piano manufacturer Schimmel reconciles the great German tradition with Japanese high-tech by integrating the latest-generation Yamaha ‘Silent’ system and naming the models ‘TwinTone’. They feature ten voices (from piano and harpsichord to choir), record, MIDI-connector, USB, In/Out. It is an ideal combination, which is difficult to resist, as Vincent Balse points out after having played a couple of notes of a theme composed by the jazz musician Michel Petrucciani. The Schimmel C 120 International TwinTone sounds firm and strong in the sonata no. 21 ‘Waldstein’ by Beethoven; in an adagio by Mozart, it reveals a sparkling and luminous tone in the treble section, provides with its action, which is always very effective, a lot of playing comfort and consequently, gives much joy to the player. Exquisite and with a warm middle section, the Schimmel C 120 International TwinTone feels comfortable through a range of repertoire: Thus, this Schimmel is essential in this price segment. A true winner.” – Marc Rouve
